

2026 CNS Abstract Presentation & Poster Directory

A quick-reference guide to presentation IDs, poster numbers, and abstract titles.

AOP Afternoon Oral Presentations	EOP Evening Oral Presentations	PL1-PL3 Platform Presentations	1-512 Poster Numbers
--	--------------------------------------	-----------------------------------	-------------------------

Entries are arranged in presentation order: AOP, EOP, Platforms 1-3, then Posters 1-512.

Afternoon Oral Presentations (AOP)

AOP-1

Long-Term Safety and Effect of Ecopipam, a Selective Dopamine D1 Receptor Antagonist, in Children, Adolescents, and Adults With Tourette Syndrome

Experimental Therapeutics • Donald Gilbert

AOP-2

Efficacy and Safety of Ocrelizumab Compared With Fingolimod in Pediatric-Onset Relapsing-Remitting MS: Results of the Phase III OPERETTA 2 Study

Neuroimmunology • Fabien Bakdache

AOP-3

Safety and efficacy of satralizumab in patients with relapsing myelin oligodendrocyte glycoprotein antibody-associated disease (MOGAD): Results from the phase 3 METEOROID trial

Neuroimmunology • Eoin Flanagan

AOP-4

Interim Safety and Efficacy of NGN-401, a Novel Regulated AAV9 Gene Therapy, from a Phase 1/2 Study in Rett Syndrome

Neurodevelopmental Disorders • Elizabeth Berry-Kravis

AOP-5

Multi-Domain Functional Gains Following TSHA-102 Gene Therapy Across the Rett Syndrome Lifespan: Safety and Efficacy Results from the REVEAL Part A Phase 1/2 Trial of TSHA-102 in Pediatric and Adolescent/Adult Cohorts

Neurodevelopmental Disorders • Elsa Rossignol

Evening Oral Presentations (EOP)

EOP-1

Zorevunersen demonstrates potential as a disease-modifying therapy in patients with Dravet syndrome: A matched-adjusted indirect comparison between natural history and patients receiving zorevunersen

Epilepsy • M Scott Perry

EOP-2

Safety and Efficacy of ETX101, an Investigational AAV9-based Gene Therapy for SCN1A+ Dravet Syndrome: Interim Results from the POLARIS Phase 1/2 Clinical Trials

Neurodevelopmental Disorders • Joseph Sullivan

EOP-3

Fenfluramine Treatment in CDKL5 Deficiency Disorder: Phase 3 Primary Efficacy and Safety Results by Age

Epilepsy • Brian Moseley

EOP-4

Efficacy of arimoclomol combined with miglustat at months 3, 6, 9 and 12 of the double-blind, randomized, placebo-controlled NPC002 trial

Neurometabolic • Mary-Jean Fanelli

EOP-5

Treatment with UX111 reduced cerebrospinal fluid (CSF) heparan sulfate (HS) exposure and stabilized or improved functioning in children with MPS IIIA

Neurodevelopmental Disorders • Deepa Rajan

Platform 1 Presentations

PL1-1

Optimizing Outcomes after Pediatric Concussion: Updates to the Living Guideline for Pediatric Concussion

Traumatic Brain Injury • Jasmin Sanchez

PL1-2

Determinants of Mortality and Neurological Sequelae in Pediatric central nervous system infections: A Cohort Study from a Middle-Income Country

Neuroinfectious Disease • Maria Sierra-Breton

PL1-3

Sustained benefit with GPi Deep Brain Stimulation in GNAO1-related Disorder

Movement Disorders • Katerina Bernardi

PL1-4

Impact of Rapid Whole-Genome Sequencing on Diagnostic Yield and Clinical Decision-Making in Acute Pediatric Neurology

Neurogenetics • Manouchehr Amanat Yazdi

PL1-5

PLP1-related disorders: Genotype Classification and Clinical Associations

Neurogenetics • Adeline Vanderver

PL1-6

Delineation of Functional Trajectories in TUBB4A-related Leukodystrophy: A Step Towards Clinical Trial Readiness

Neurodevelopmental Disorders • Francesco Gavazzi

PL1-7

Bridging the Diagnostic Gap: Clinical Predictors of Pediatric Neurodevelopmental Disorders in Resource-Limited Settings

Neurodevelopmental Disorders • Isaac Atuahene

Platform 2 Presentations

PL2-1

Up-Front Rituximab Reduces Relapse Risk in Pediatric-Onset Opsoclonus Myoclonus Ataxia Syndrome

Neuroimmunology • Laura Saucier

PL2-2

Cerebrospinal Fluid T-Cell Activation Correlates with Clinical Severity and Diagnostic Abnormalities in Down Syndrome Regression Disorder

Neuroimmunology • Rohan Singh

PL2-3

Characteristics of Epilepsy in Patients with Down Syndrome: A Retrospective Cohort Study

Epilepsy • Shadi Shams

PL2-4

Epilepsy-associated gene variants are not associated with acquired epilepsy risk after acute provoked neonatal seizures

Epilepsy • Adam Numis

PL2-5

A prognostic biomarker for refractory epilepsy after infantile epileptic spasms syndrome – Validation of the 2021 BASED score

Epilepsy • John Mytinger

PL2-6

Seizure status Modifies Response to Motor Rehabilitation in Perinatal Arterial Ischemic Stroke; the I-ACQUIRE trial

Stroke • Warren Lo

PL2-7

Impairments, epilepsy, and imaging in dyskinetic cerebral palsy vs. spastic quadriplegic cerebral palsy: a retrospective study

Cerebral Palsy • Victoria D'Amours

Platform 3 Presentations

PL3-1

Clinical Utility of Plasma Neurofilament Light Chain as a Prognostic Biomarker in KIF1A-Associated Neurological Disorder (KAND)

Movement Disorders • Habibah Agianda

PL3-2

Gene Supplementation Therapy Provides Long-Term Rescue of the Alternating Hemiplegia of Childhood Phenotype in the ATP1A3D801N/+ Mouse Model

Neurogenetics • Mohamad Mikati

PL3-3

Nuclease-free AAVHSC15 HR-mediated exon replacement of Mecp2 rescues survival and neurologic phenotype in the R306C mouse model of Rett syndrome

Neurogenetics • Sampathkumar Rangasamy

PL3-4

Small-Molecule Therapeutics for AP-4-Related Hereditary Spastic Paraplegia

Neurodevelopmental Disorders • Zoe Piccus

PL3-5

Microglial transplant: Novel treatment for Vanishing White Matter Leukodystrophy

Neurodevelopmental Disorders • Joshua Bonkowsky

PL3-6

Biallelic ADORA1 Variants Cause Childhood-Onset Epilepsy Through Impaired Basal Adenosine A1 Receptor Signaling

Epilepsy • Ali Reza Tavasoli

PL3-7

Functional impacts of autism-associated TRIO variants on GABAergic interneurons

Neurogenetics • Asmaa TOUMI

Poster Presentations 1-512

Poster numbers are listed numerically for fast lookup.

1	From Seizure to Paralysis: Acute Neurologic Decline in a Hospitalized Child Autonomic Disorders • Omneya Ayoub
2	Neurodevelopmental Contributions to Pediatric Dysautonomia: Autism Associated Phenotypes in a Multidisciplinary POTS Clinic Autonomic Disorders • Meeryo Choe
3	Diagnostic Criteria of Postural Tachycardia During Active Standing Test in Adolescents Autonomic Disorders • Imad Jarjour
4	Standardized Diagnosis and Management of Paroxysmal Sympathetic Hyperactivity Autonomic Disorders • Laura Perez-Arnold
5	Affirmative Experiences and Resilience in Tourette Syndrome: A Qualitative Study of Key Stakeholders Behavioral Neurology • Jaclyn Martindale
6	Safety and Cognitive Outcomes of Methylphenidate in Pediatric Epilepsy: A Systematic Review and Meta-Analysis Behavioral Neurology • Shaun Nevil
7	Analyzing Child Neurologist's Diagnosis of Pediatric Vitamin C Deficiency in a Single Healthcare System: A Five-Year Retrospective Review Behavioral Neurology • Marielena Villaran
8	Electroencephalography features in ADHD to close the diagnostic gap: A systematic review Behavioral Neurology • Gonca Bektas
9	Home-Administered Low-Level Laser Therapy for Pediatric Autism Spectrum Disorder: Design of A Randomized, Double-Blind, Placebo-Controlled Trial Behavioral Neurology • Jahnavi Tatachar
10	Pediatric Acute-onset Neuropsychiatric Syndrome in Children With Autism Spectrum Disorder Behavioral Neurology • Jenny Wilson
11	Late Adolescent Regression in Autism Spectrum Disorder Following Bereavement: A Case Report Behavioral Neurology • Shailja Sharma
12	Social Determinants and Psychiatric Hospitalization in Pediatric Autism Behavioral Neurology • Shreya Tripathy
13	The Genetic Landscape of Catatonia in Autism Spectrum Disorder and Other Neurodevelopmental Disorders Behavioral Neurology • Shreya Tripathy
14	The Effect of Maternal Diabetes, Obesity, and Preeclampsia on the Incidence of Cerebral Palsy (CP) in Offspring: Review of the Literature Cerebral Palsy • Anshvir Bhangoo
15	Unexpected Scurvy Diagnosis in Child with Cerebral Palsy and G-tube Dependence Cerebral Palsy • Sarah Fine
16	Novel presentation of a FOXP1-related disorder including craniosynostosis and cerebral palsy Cerebral Palsy • Kelly Pring
17	Variations in Clinical Features of Cerebral Palsy in Rural vs. Urban Canada Cerebral Palsy • Victoria D'Amours

18	Prognostic Utility of Electroencephalography and General Movement Assessment for Cerebral Palsy in Neonates with Hypoxic-Ischemic Encephalopathy Cerebral Palsy • Jody Tao
19	Clinical Trial in Progress: Galassia, CP-201, a Phase 2, Randomized, Double-Blind, Vehicle-Controlled Study of Intranasal Cenegermin in Pediatric Spastic Cerebral Palsy Cerebral Palsy • Domenico Romeo
20	Equity of Access to Whole Exome Sequencing in Pediatric Epilepsy Patients: A Mixed Methods Study Diversity, Equity, Inclusion • Alysha Lee
21	Assessing Neurology Clinicians' Comfort with Screening for Social Determinants of Health: A Focus on Energy Insecurity as an Equity Issue Diversity, Equity, Inclusion • Samuel Belfer
22	BrainIACS: A Community-Based Health Literacy Approach to Pediatric Epilepsy Diversity, Equity, Inclusion • Laxhmi Ramjit
23	Impact of an Inclusive Public Transit Training Program on Self-Efficacy and Transit Use in Adolescents with Neurodevelopmental Disorders Diversity, Equity, Inclusion • Suhantee Sathananthan
24	Reducing Barriers to Participation in Pediatric Neurodevelopmental Research: Application of the Framework-Guided Recruitment Strategies Diversity, Equity, Inclusion • Emma Cardwell
25	Racial, Ethnic, and Socioeconomic Disparities in ASD Diagnosis Among Children: A Systematic Review of the Diagnostic Care Pathway, 2000–2025 Diversity, Equity, Inclusion • Nikhila Archakam
26	Joseph H. French: The First Black Board-Certified Child Neurologist Diversity, Equity, Inclusion • Alison Christy
27	Center-Reported Barriers to Applied Behavior Analysis Access for Children with Autism Spectrum Disorder Across New Jersey: A Survey of Providers Diversity, Equity, Inclusion • Olivia Pavin
28	BRIDGING GAPS IN CHILD NEUROLOGY: LESSONS FROM AFRICAN CLINICAL PRACTICE Early Stage Investigator • Mabel Owusu Afriyie
29	NIH and NINDS: Funding Updates and Opportunities to Advance Neuroscience Early Stage Investigator • Adam Hartman
30	Novel Therapy for Alternating Hemiplegia of Childhood: Four Lead Deep Brain Stimulation Early Stage Investigator • Mohamad Mikati
31	International clinical guideline for diagnosis and management of Wolfram syndrome - a modified Delphi study. Early Stage Investigator • Saumel Ahmadi
32	A Cerebrospinal Fluid Cytokine Atlas in Pediatric Patients Across Disease Early Stage Investigator • Samuel Belfer
33	Improving Diagnosis and Treatment Decision-Making in Tourette Syndrome in an Evolving Therapeutic Landscape using a Web-based Continuing Medical Education Platform Education • Vandana Gupta
34	Increasing the pipeline from medical student to child neurologist: A needs assessment survey assessing barriers to pursuing child neurology Education • Jacob Hanson

35	Bridging the Synapse: A Collaborative Neurology Symposium for Community General Pediatricians/Nurses/APPs Education • Victoria Hardwick
36	Against the Tide: Assessing the Success of Child Neurology as a Model for Sustainable Growth in Pediatric Subspecialty Training Education • John Pugh
37	Development of a Pediatric Neurocritical Care Simulation Curriculum: Needs Assessment and Pilot Study Education • Lauren Hurst
38	Adult Neurology Call Practices for Child Neurology Residents Education • Gabriella Tison-Brandon
39	Meaning in the Clicks: Using Electronic Health Record Metadata to Identify Meaningful Child Neurology Resident Encounters with Patients Education • Rachel Gottlieb-Smith
40	Identifying Pediatric Neurology Care Gaps in Rural Honduras: A Needs Assessment Education • Joanna Bendeck
41	Overcoming Neuroanxiety: Teaching High-Yield Pediatric Neurology Topics to the Non-Pediatric Neurologist Education • Melanie Gershman
42	Concussion Education with Community Partners: A Collaboration with Large Urban School District Nurses to Promote Concussion Management in High School Settings Education • Elise Watson
43	Will Pediatric Practitioners Consider Treating 3 Benign Epilepsy Syndromes? A Survey of Rural and Urban Pediatric Practitioners Education • Magdelin Lopez
44	Deuterium Magnetic Resonance Spectroscopy Detects Ketogenic Diet Induced Changes in Brain Energy Metabolism in a Dravet Syndrome Mouse Model Epilepsy • Liu Lin Thio
45	A first-in-human study of the antisense oligonucleotide S230815 in paediatric participants with KCNT1-related Developmental and Epileptic Encephalopathy Epilepsy • Carlos Estevez-Fraga
46	Co-Design of a Curriculum about Reproductive Health and Epilepsy for Child Neurology Residents Epilepsy • Laura Kirkpatrick
47	Sex-specific Divergence in Growth Rates among Hispanic Children with Epilepsy: A longitudinal retrospective study Epilepsy • Megan Szobody
48	DESCRIPTION OF PHARMACOTHERAPY USED IN THE TREATMENT OF NEONATAL SEIZURES IN A PEDIATRIC TERTIARY CENTER Epilepsy • Nicolas Chrestian
49	Feasibility and Acceptability of Qualitative Insights (FAQS): Implementing Common Data Elements in Pediatric Health Equity Epilepsy • Deirdre Flanagan
50	The Use of Perampanel in Neonates and Young Children Epilepsy • Aminah Ahmed
51	Pharmaceutical Grade Oral Pyridoxal 5'-Phosphate for the Treatment of Patients With PNPO Deficiency (MEND-PNPO) Study Design and Rationale Epilepsy • Phillip Pearl

52	Angiocentric Glioma as The Cause of Lesional Intractable Epilepsy Epilepsy • Victoria Mazo
53	Anti-Seizure Medication Use and Effectiveness in 13,855 Children: A Large Real-World Cohort Study Epilepsy • Jack Abend
54	Nonketotic Hyperglycinemia in Three Pediatric Patients: Clinical Features and Response to Ketogenic Diet Epilepsy • Jonathon Chon Teng Chio
55	sEEG for Pediatric Tumor-Related Epilepsy: A Systematic Review of Indications, Outcomes, and Surgical Impact Epilepsy • Nicholas Benjamin
56	Characterizing neurological conditions in pediatric patients from Nunavut receiving care in Ottawa: A retrospective study Epilepsy • Kate Hurley
57	Cannabidiol Oral Solution (CBD-OS) for the Treatment of Focal-Onset Seizures: Design of a Phase 1b Open-Label Study Epilepsy • Alessandra Milesi-Hallé
58	Assessing the Effectiveness of Telemedicine for Pediatric Epilepsy Management Epilepsy • Loubna Elhelu
59	Identifying Health Needs, Service Gaps, and Barriers to Care Among Pediatric Epilepsy Populations during Transition to Adulthood Epilepsy • Stephanie Martinez
60	Eye-movements as a window into neurological development in Childhood Absence Epilepsy Epilepsy • Rachel Kuperman
61	Clinical Outcomes After Long-Term Ketogenic Diet Completion and Discontinuation in Korean Pediatric Epilepsy Epilepsy • You Min Kang
62	Burden of Illness in Developmental and Epileptic Encephalopathies Beyond Dravet Syndrome, Lennox-Gastaut Syndrome, and Tuberous Sclerosis Complex: A Systematic Literature Review Epilepsy • Sanket Shah
63	Personal and Familial Autoimmunity in Landau-Kleffner Syndrome Epilepsy • Jenna Harowitz
64	Cognitive and Attentional Dysfunction in Children with Self-limited Epilepsy with Centrotemporal Spikes: Factors Associated with ADHD Epilepsy • Jieun Choi
65	One Mutation, Four Phenotypes: DEPDC5 in a Father and Three Siblings Epilepsy • Sophia Falmagne
66	Association of Fenfluramine Treatment and Everyday Executive Function in Preschool-Aged Children With Lennox-Gastaut syndrome Epilepsy • Amélie Lothe
67	Prevalence, Treatment Patterns, and Healthcare Resource Utilization Among Patients With CDKL5 Deficiency Disorder: Retrospective Analysis of US Claims Data Epilepsy • Melinda Martin
68	Early and Sustained Reduction of Seizures in Children with Drug-Resistant Epilepsy Treated with Vagus Nerve Stimulation Therapy Epilepsy • James Wheless

69	Non-Seizure Outcomes in Children with Drug-Resistant Epilepsy Treated with Adjunctive Vagus Nerve Stimulation Epilepsy • Kathryn Nichol
70	Neuropsychological Profile of Patients with Juvenile Absence Epilepsy: A Systematic Review Epilepsy • Nidhi Sthanki
71	SUDEP knowledge and counseling rates among pediatric neurology trainees Epilepsy • Sarika Sachdeva
72	Antiseizure Medication Trajectories After Pediatric DBS: A Single-Center Case Series Epilepsy • Molly Baumhauer
73	Unmasking Focal Epilepsy in the Emergency Department: A Missed Diagnostic Opportunity Epilepsy • Michelle Goodman
74	Unusual case of Wernicke Encephalopathy in a pediatric patient on ketogenic diet Epilepsy • Laura Varan
75	A Comparative Analysis of Clinical Practice Gaps in Dravet Syndrome: Findings From a CME-Certified Survey of Neurologists and Pediatricians Epilepsy • Thomas Finnegan
76	Treatment of Tonic-Clonic Status Epilepticus After T1 With Diazepam Nasal Spray in Patients Aged 2–17 Years: A Combined Cohort Analysis Epilepsy • Eric Segal
77	La Clinica Integral de Epilepsia Para Niños y Adolescentes (CIENA) Epilepsy • Joanna Bendeck
78	Focal Epilepsy Associated with Cortical Malformation in an Infant with Nevus Sebaceous, Aplasia Cutis Congenita, and a RELN Variant of Uncertain Significance/ A Case report Epilepsy • Hasmik Verdyan
79	Severe ketoacidosis in response to the ketogenic diet for epilepsy: a case report and center-based analysis Epilepsy • Emily Grew
80	Underutilization of FDA approved Dravet Syndrome (DS) Specific Therapies: Findings from a US Multi-Center Survey and Advisory Board Epilepsy • Carly Katterman
81	Practical Consensus Recommendations for Rational Polytherapy Involving Stiripentol in Dravet Syndrome: Preliminary Results of a US Cohort Epilepsy • Dalton Lovins
82	Seizure Assessment Tool for Children on a Pediatric Epilepsy Monitoring Unit Epilepsy • Zoe Krochenski
83	Clinical characteristics and use of highly purified cannabidiol oral solution among patients with developmental and epileptic encephalopathies: A US-based retrospective cohort analysis Epilepsy • Arthur Sillah
84	Gaps in SUDEP Communication in Pediatric Epilepsy: A Systematic Review Epilepsy • Ashiana Sunderji
85	A 6-year-old Boy with Recurrent Stroke-Like Symptoms - An Atypical Presentation of Rasmussen Encephalitis Epilepsy • Rachna Karumuri
86	Treatment of infantile spasms in Saudi Arabia Epilepsy • mohammed jan

87	Real-World Use and Effectiveness of Stiripentol in U.S. Patients with Dravet Syndrome: Results from the STIRUS Study Epilepsy • Mary Fayazi
88	Climate-related environmental exposures and presentation for epilepsy among children in Bangladesh Epilepsy • Maitreyi Mazumdar
89	An Analysis of Seizure and Psychiatric Outcomes Following Neuromodulation, Medication, and Surgical Therapies for Pediatric Epilepsy with Intractable Focal Aware Seizures Epilepsy • Sanjiv Harikumar
90	Hemispherectomy in a patient with refractory infantile spasms secondary to cystic encephalomalacia from COVID-related acute hemorrhagic leukoencephalitis, a Case Report Epilepsy • Aaron Hocher
91	Frequency of Patient-Reported Seizure Clusters in a Clinical Dataset From a Pediatric Epilepsy Center in Canada Epilepsy • Morris Scantlebury
92	Patterns of Antiseizure Medication (ASM) Utilization in Participants with Developmental and Epileptic Encephalopathies (DEEs) and Responses to Bexicaserin Treatment in the Phase 1b/2a PACIFIC Randomized Controlled Trial (RCT) Epilepsy • Shilpa Chatlani
93	Analyses of Bexicaserin for the Treatment of Seizures in Developmental and Epileptic Encephalopathies (DEEs): Response Over Time and Responder Rates in the Phase 1b/2a PACIFIC Randomized Controlled Trial (RCT) Open-Label Extension (OLE) Epilepsy • Shilpa Chatlani
94	Interval Between Seizure Clusters (SEIzure interVAL; SEIVAL) in Children Aged 2-17 Years Using 70-Day Analysis Periods in Two Studies Epilepsy • Eric Segal
95	Real World Effectiveness of Cenobamate in Pediatric Epilepsy: A Single-Center Experience in Patients Age 6 to 18 years. Epilepsy • Kennedy Brooks
96	Trends, Demographic Characteristics, Risk Factors, and Outcomes of Epileptic Spasm Hospitalizations: A U.S. Population-Based Analysis (2016–2022) Epilepsy • Snigdha Kosuri
97	Evaluating variables in epilepsy history as predictors of seizure response to ketogenic diet. Epilepsy • Rachel Carpenter
98	Progressive Ischemic and Hemorrhagic Strokes in Neonatal COL4A1 Mutation with Familial Epilepsy Spectrum Epilepsy • Rhea Zahir
99	Neighborhood-Level Disparities in Access to Pediatric Epilepsy Monitoring Units Epilepsy • Rakhi Das
100	An Interesting Case of Lesional Somatic TSC2 Mosaicism in an Epileptogenic Focal Cortical Dysplasia Epilepsy • Aaron Downs
101	Expanding the phenotypic presentation spectrum of KCNT1 variants: A case report of a 20-month-old with a pathogenic variant of KCNT1 Epilepsy • Jeffrey Millman
102	Early Feasibility of PEARLS (Pediatric Epilepsy Automated Referral & Learning System): A Standardized Workflow Dataset for Pediatric Suspected Seizure Referrals Epilepsy • Dax Bourcier

103	Non-Seizure Outcomes of Pediatric Hemispheric Epilepsy Surgery: A Roadmap for Child Neurologists Epilepsy • Michael Granovetter
104	Risk Factors for Seizures and Epilepsy in Children with Cerebral Cavernous Malformations: A Systematic Review and Meta-Analysis Epilepsy • Aryan Wadhwa
105	Reproductive Health Counseling in Adolescent Epilepsy: A Qualitative Study of Child Neurologist Communication Epilepsy • Parth Aggarwal
106	Ketogenic Diet in the Successful Treatment of Super-Refractory Status Epilepticus Secondary to Group B Streptococcus Meningoencephalitis with Stroke in a Neonate: A Case Report Epilepsy • Emily Matney
107	Corpus Callosotomy for Drug-Resistant Epilepsy: Systematic Review and Structured Evidence Synthesis of Seizure Outcomes, Surgical Approaches, and Predictors. Epilepsy • Alaina Carman
108	Vigabatrin-associated chorea: an unusually early onset Epilepsy • Wendi Wang
109	Areas of Concordance and Discordance in Communication About Reproductive Health Amongst Youth with Epilepsy, Parents, and Caregivers Epilepsy • Meredith Montella
110	Epileptogenic Structural Lesions on MRI in Pediatric Focal Epilepsy: A Population-Based Cohort Study Epilepsy • Katarina Alajbegovic
111	Age-Stratified Interictal Epileptiform Discharges in SCN1A-Related Epilepsy and Association With Early Sodium Channel-Blocking Antiseizure Medication Exposure Epilepsy • Samaneh Esteghamat
112	Targeted AMPA-Receptor Blockade with Perampanel-resulting in global clinical improvement in QARS1-Related Rare Developmental and Epileptic Encephalopathy: A Case Series Epilepsy • Sonam Bhalla
113	A Rare Case of Asystole in an Epilepsy Patient Receiving Cenobamate and Lamotrigine Epilepsy • Jamie Solis
114	Preliminary Feasibility of Open BCI-Based EEG as a Rapid Screening Tool in the Pediatric Epilepsy Epilepsy • Sarah Ward
115	The Great Mimicker: How scrutinizing a diagnosis of PNES revealed insular epilepsy Epilepsy • Carlos Palomino
116	Low-Grade Glioma in a Child with DEPDC5-Related Epilepsy: An Unexpected Pathologic Finding Epilepsy • Natasha Glenn
117	Developing a Family Navigation Model to Help Support the Epilepsy Transition of Care Process Epilepsy • Chyanne Reyes
118	Treatment of non-convulsive status epilepticus in Angelman syndrome: case report and review of literature Epilepsy • Magda Nowicki
119	Medical Cannabis in Pediatric Epilepsy: An Ethical Analysis of Consent, Access, and Long-Term Safety Epilepsy • Sarah Razzaq

120	Fenfluramine for Seizure-Associated Respiratory Compromise in Drug-Resistant Epilepsy: A Three-Patient Case Series Epilepsy • Sarah Schorr
121	A Systematic Review and Ethical Analysis of mRNA COVID-19 Vaccines in Children and Adolescents Ethics • Alexander Jares
122	Efficacy and safety of zilganersen, an investigational RNA-targeted antisense therapy, in people living with Alexander disease: Additional data from the pivotal phase 1-3 trial Experimental Therapeutics • Amy Waldman
123	Safety and Effect of Ecopipam During the First 8 Weeks of Treatment for Tourette Syndrome: A Post Hoc Analysis Experimental Therapeutics • Kinga Tomczak
124	Ecopipam Does Not Negatively Impact Weight, Metabolic Parameters, or Electrocardiogram Measurements or Induce Movement Disorders in Individuals With Tourette Syndrome Experimental Therapeutics • Kinga Tomczak
125	Presence of Common Psychiatric Diagnoses Did Not Impact the Efficacy or Safety of Ecopipam in Individuals With Tourette Syndrome Experimental Therapeutics • John Flatt
126	Phase 1 ASCEND Study Evaluating INS1201 AAV9 Gene Therapy in Ambulatory Pediatric Males with Duchenne Muscular Dystrophy: Trial in Progress Experimental Therapeutics • Sheritha Lee
127	Autism, Sleep, and Medicinal Cannabis: 18-Month Prospective Registry Outcomes on Efficacy and Safety Experimental Therapeutics • Aiza Salman
128	Management of 5 Cases of Thrombotic Microangiopathy Following CNS-Directed AAV Gene Therapy Experimental Therapeutics • Alex Fay
129	Advancing Clinical Trials in Pediatric Neurology: The Expanding Role of NeuroNEXT Experimental Therapeutics • Jennifer Vermilion
130	Ecopipam, a First-in-Class, Selective Dopamine D1 Receptor Antagonist, Is Noncarcinogenic in Rodents Experimental Therapeutics • Stephen Wanaski
131	NINDS Clinical Trial Networks Experimental Therapeutics • Nicole Farhat
132	Dystonia after bilateral intrathalamic AAV gene therapy in juvenile GM2 gangliosidosis: evolution of disease or related to treatment? Experimental Therapeutics • Cintia da Hora
133	Everolimus for Neurological Manifestations of Pediatric Tuberous Sclerosis Complex: A Systematic Review and Meta-analysis Experimental Therapeutics • Angel Godina-Sanchez
134	First-in-human experimental antisense oligonucleotide treatment for TUBB4A-related leukodystrophy: experience from three centers Experimental Therapeutics • Amanda Nagy
135	First-in-human experimental antisense oligonucleotide treatment for Childhood-Onset Neurodegeneration with Brain Atrophy Experimental Therapeutics • Amanda Nagy

136	Self-amplifying RNA (saRNA) produces high levels of survival motor neuron (SMN) protein, circumventing limitations of spinal muscular atrophy (SMA) disease-modifying therapies (DMTs): AAV9 viral vector & anti-sense oligonucleotides (ASOs) Experimental Therapeutics • Christian DeMoya
137	Expanding Phenotypic Characterization of Patients with COL4A1/2 Mutation Fetal Neurology • Mackenzie Buls
138	Association of fetal cerebral growth and sulcal development with two-year neurodevelopmental outcome in children with prenatally diagnosed mild to moderate isolated ventriculomegaly Fetal Neurology • Sophie Reid
139	Fetal MRI of Cortical Malformations of Development and Associated Postnatal Outcomes Fetal Neurology • Frances St George-Hyslop
140	A multi-center quality improvement initiative: use of imaging library to enhance communication in fetal neurology consultations Fetal Neurology • Amanda Summers
141	Prenatally Diagnosed TUBB3 R262H Tubulinopathy with Congenital Absence of Cranial Nerves III and IV: A Case Report Fetal Neurology • Maren Heller
142	Preliminary Report of Neuroimaging and Infant Neurodevelopmental Outcomes Following Antenatal Lyme Disease Exposure (NCT06026969) Fetal Neurology • Sarah Mulkey
143	Defining developmental vectors and timepoints for prenatal intervention using a high resolution ultrasound atlas of primate brain development. Fetal Neurology • Rohan Soman
144	The Impact of Climate Change on Pediatric Neurological Disorders: A Scoping Review of Current Evidence Global Neurology • Kirsten Sjonnesen
145	Pro bono genetics and neurology services on a low-income Caribbean nation Global Neurology • Shannon Shipley
146	Declining Mortality and Rising Disability in Neonatal Encephalopathy: Global Disparities by Socio-demographic Index Global Neurology • Shreya Tripathy
147	Challenges in analyzing GFAP in a clinical trial in individuals with Alexander disease Global Neurology • Belinda Cowling
148	Functional scAAV vectors for rapid, cell-type specific tracing and functional manipulation of neurons in-vivo Global Neurology • Adam Lu
149	Neurologic sequelae in Liberian pediatric Ebola survivors 10 years after infection Global Neurology • Hanalise Huff
150	Elevated CSF IL-6 in an Adolescent with Reversible Cerebral Vasoconstriction Syndrome with Hemorrhagic Posterior Reversible Encephalopathy Syndrome Headache • Darcy Engelhart
151	Remote Electrical Neuromodulation (REN) Wearable Device is Safe for Multiple Treatments a Day and for Everyday Treatment in Pediatric Patients with Migraine Headache • Klaus Werner
152	Onabotulinumtoxin A is an effective preventative treatment of chronic and daily pediatric migraine Headache • Lauren Vilardo

153	Redefining the Range of “Normal” Cerebrospinal Fluid Opening Pressure in the Pediatric Population Headache • Maxime Munyeshyaka
154	Primary Stabbing Headache in a Child with Chiari I Malformation and Hypophosphatasia: A Diagnostic Challenge Headache • Lin Yao
155	Primary Headache in Children: Clinical Characteristics and Impact on School Functioning in a Low-Resource Country Headache • Amal Abu Libdeh
156	Improving Access to Headache Care through eConsults Headache • Abigail Turner
157	Clinical Characteristics of pediatric patients with a Primary Headache in the ED, PPU and Inpatient settings: A Quality Improvement Study Headache • Debra O'Donnell, MD
158	Comparative Prescription Patterns for the Treatment of Chronic Migraine in Pediatric Patients with Transplanted Solid Organs: Results from a Cross-Institutional Electronic Health Records Database Headache • Benjamin Africk
159	Evaluating and Treating Headache in Individuals with Autism Spectrum Disorder (ASD) Headache • Lanie Masset
160	An 18 year old girl with headaches and altered mental status Headache • Vihas Abraham
161	PET-FDG in Subependymal Giant Cell Astrocytoma in Tuberous Sclerosis Lifespan Manifestations of Childhood Onset Conditions • Ne-Ron Loh
162	Evaluating Adults with Long Standing Neurodevelopmental Disabilities at the Undiagnosed Diseases Program (UDP): The Role of Child Neurology Lifespan Manifestations of Childhood Onset Conditions • Maria Acosta
163	Chorea, epilepsy, and cyclic irritability crises due to a novel pathogenic variant in CAMK2B Movement Disorders • Chaitanya Aduru
164	Mass Psychogenic Illness (MPI) and Mass Media: LeRoy, New York (NY) Movement Disorders • Jennifer McVige
165	Impaired Galectin-9 secretion in patient fibroblasts of AP-4-related hereditary spastic paraplegia Movement Disorders • Tobias Brunnbauer
166	Online CME Improved Neurologist Knowledge and Confidence in the Current and Emerging Approaches to the Management of Tourette Syndrome Movement Disorders • Thomas Finnegan
167	DBSMATCHMaker: A Global Collaborative Platform for Deep Brain Stimulation in Rare Monogenic Movement Disorders Movement Disorders • Kathryn Yang
168	Clinical and Molecular Phenotype of PTRHD1-associated Juvenile Parkinsonism Movement Disorders • Bhavan Modi
169	Childhood dystonia is associated with synchronous bursting in thalamus, basal ganglia, and brainstem Movement Disorders • Terence Sanger
170	Right PreSMA iTBS Acutely Engages Inhibitory Motor Physiology in Youth with Tourette Syndrome Movement Disorders • Travis Larsh

171	Improving Early Recognition of Tic Disorders in Pediatric Practice: Utility of the DoTS Screener Movement Disorders • Somayya Upal
172	What tics respond best to Comprehensive Behavioral Intervention for Tics (CBIT) in community practice? Movement Disorders • Ashmitha Raja
173	Deep Brain Stimulation Reorganizes a Cortico-Pallidal State Linked to Muscle Activity in Pediatric Dystonia Movement Disorders • Travis Larsh
174	Bilateral GPI and PPN Deep Brain Stimulation for Secondary Dystonia After Hypoxic Brain Injury: A Case Report Movement Disorders • Zachary LaJoie
175	Characterizing the metabolomic profile of the synaptic space in children with unexplained neurotransmitter disorders. Movement Disorders • Dakota Peacock
176	Explosive-Onset Oromaxillary Dyskinesia as the Initial Manifestation of Anti-NMDAR Encephalitis Following Suspected Subclinical HSV-1 Reactivation Movement Disorders • Edward Poluyi
177	Holmes Tremor in Pediatrics: A Multicenter Case Series Movement Disorders • Delia Rospigliosi
178	Investigating Neurodevelopmental and Functional Alterations in AP-4-Deficient Mice as a Model for Hereditary Spastic Paraplegia Movement Disorders • Franziska Hammar
179	Caregiver-Reported Health-Related Quality of Life and Sleep Disorders in GNB1/GNB2-Related Neurodevelopmental Disorders: Cross-Sectional Findings from a Prospective Natural History Study Movement Disorders • Jonas Moghib
180	Characterizing Pediatric Dystonia: Clinical Phenotypes and Diagnostic Yield of Genetic and Metabolic Testing Movement Disorders • Cecilia O'Brien
181	Phenotypic Characterization and Natural History of Progressive Myoclonic Epilepsy Type 1 (EPM1/Unverricht-Lundborg Disease): An International Registry Study Movement Disorders • Zainab Zaman
182	Atypical Episodic Hypotonia Responsive to Verapamil in a Child with RYR1 and GNAS Variants Movement Disorders • Leslie Beltran
183	Non-Pharmacologic Management of PRRT2-related Paroxysmal Kinesigenic Dyskinesia Movement Disorders • Darcy Engelhart
184	Parent-Reported Functional Impairment in Youth with Tic and Other Movement Disorders: A Longitudinal EHR Study Movement Disorders • Karlee Migneault
185	Establishing a Multidisciplinary Tic Clinic: Integrating CBIT, CBT, and ERP Into a Comprehensive Care Model at an Academic Pediatric Neurological Institute Movement Disorders • Tammy Tarhini
186	Neurocognitive and Emotional Outcomes in Children with History of Perinatal Hypoxic-Ischemic encephalopathy and normal Magnetic Resonance Brain Imaging Neonatal Neurology • Hui Li
187	A case of severe neonatal hypotonia with IPEX myositis cured after hematopoietic stem cell transplantation Neonatal Neurology • Zoe Labelle

188	Neurodevelopmental outcomes of infants with hypoxic ischemic encephalopathy and isolated abnormal MR spectroscopy Neonatal Neurology • Michelle Machie
189	A Decade of Neonatal Subpial Hemorrhages – Imaging characteristics, clinical risk factors and neurologic outcomes Neonatal Neurology • Mia Chen
190	Preventing DHA oxidation using deuterated DHA ameliorates neonatal hypoxic ischemic brain injury. Neonatal Neurology • Joseph Vithayathil
191	Temporal Lobe Measurements in Preterm Infants Receiving Standard Care versus Tailored Neurosensory Experiences in the Neonatal Intensive Care Unit Neonatal Neurology • Alexandra Brooks
192	Etiology of Neonatal Seizures in the Pediatric Emergency Department Neonatal Neurology • Kristen Bolte
193	Natural Course of Post-Hemorrhagic Ventricular Dilation in Neonates with High-Grade Intraventricular Hemorrhage Neonatal Neurology • Natalia Fuenzalida
194	Epigenetic regulation of neurogenesis by Gadd45 β in response to hypoxic ischemic injury in neonatal mice Neonatal Neurology • Vincent Shieh
195	Investigating brain volume in very preterm infants after arachidonic and docosahexaenoic acid supplementation Neonatal Neurology • Gunnthorunn Gunnarsdottir
